

# Agricultural Operations: Policy Summary

**Threat 10 & 11: The application, handling & storage of pesticides**

**Threat 15: The handling & storage of fuel**

**Incentive, Education & Outreach Policies**

## Fuel: Handling and Storage

**Future handling and storage of fuel will need to occur outside of significant threat areas.** (Policy # FUEL-2)

**A risk management plan** will need to be negotiated between the risk management official and those currently handling and storing fuel within the significant threat area. The risk management plan may require secondary containment, spill and leak detection and collision protection measures to be put in place. (Policy # FUEL-1)

*This is a summary only and not a complete list of policies. See section 16.15 of the Approved Source Protection Plan for a complete list of applicable policies.*

## Pesticides: Application, Handling and Storage

**Future handling and storage** of pesticides will need to occur away from significant threat areas. This means that all future handling and storage facilities will need to be constructed outside of the significant threat areas. (Policy # PEST (H&S)-2)

**A risk management plan** will need to be negotiated between the risk management official and those applying pesticides within a significant threat area now and in the future. The risk management plan will require pesticides to be applied by a certified professional using prescribed label rates. (Policy # PEST (App)-1)

**A risk management plan** will need to be negotiated between a risk management official and those currently handling and storing pesticides within a significant threat area. (Policy # Pest (H&S)-1)

*This is a summary only and not a complete list of policies. See section 16.10 and 16.11 of the Approved Source Protection Plan for a complete list of applicable policies.*

## Incentives, Education & Outreach Policies

**If funding is available**, all agricultural properties within the significant threat area will be eligible for stewardship and incentive programs to address significant drinking water threats.

**All agricultural properties** within the significant threat area will be involved in an education and outreach program that promotes best management practices.

*This is a summary only and not a complete list of policies. See section 17 (pages 138-158) of the Approved Source Protection Plan for a complete list of applicable policies.*
