

# Drains Are Not Dumps

Toxic substances are found in many common products. Dense non-aqueous phase liquids, or DNAPLs, are especially toxic substances that are sometimes found in the products below. Toxic even in small amounts, they are almost impossible to remove once they contaminate a water supply. PREVENTION is the key to dealing with DNAPLs.

Paint stripper/  
thinner

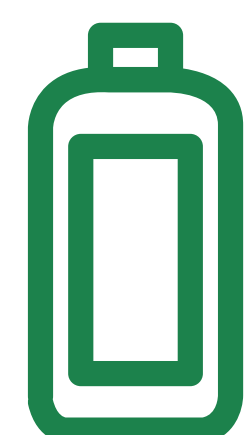

Metal  
degreaser

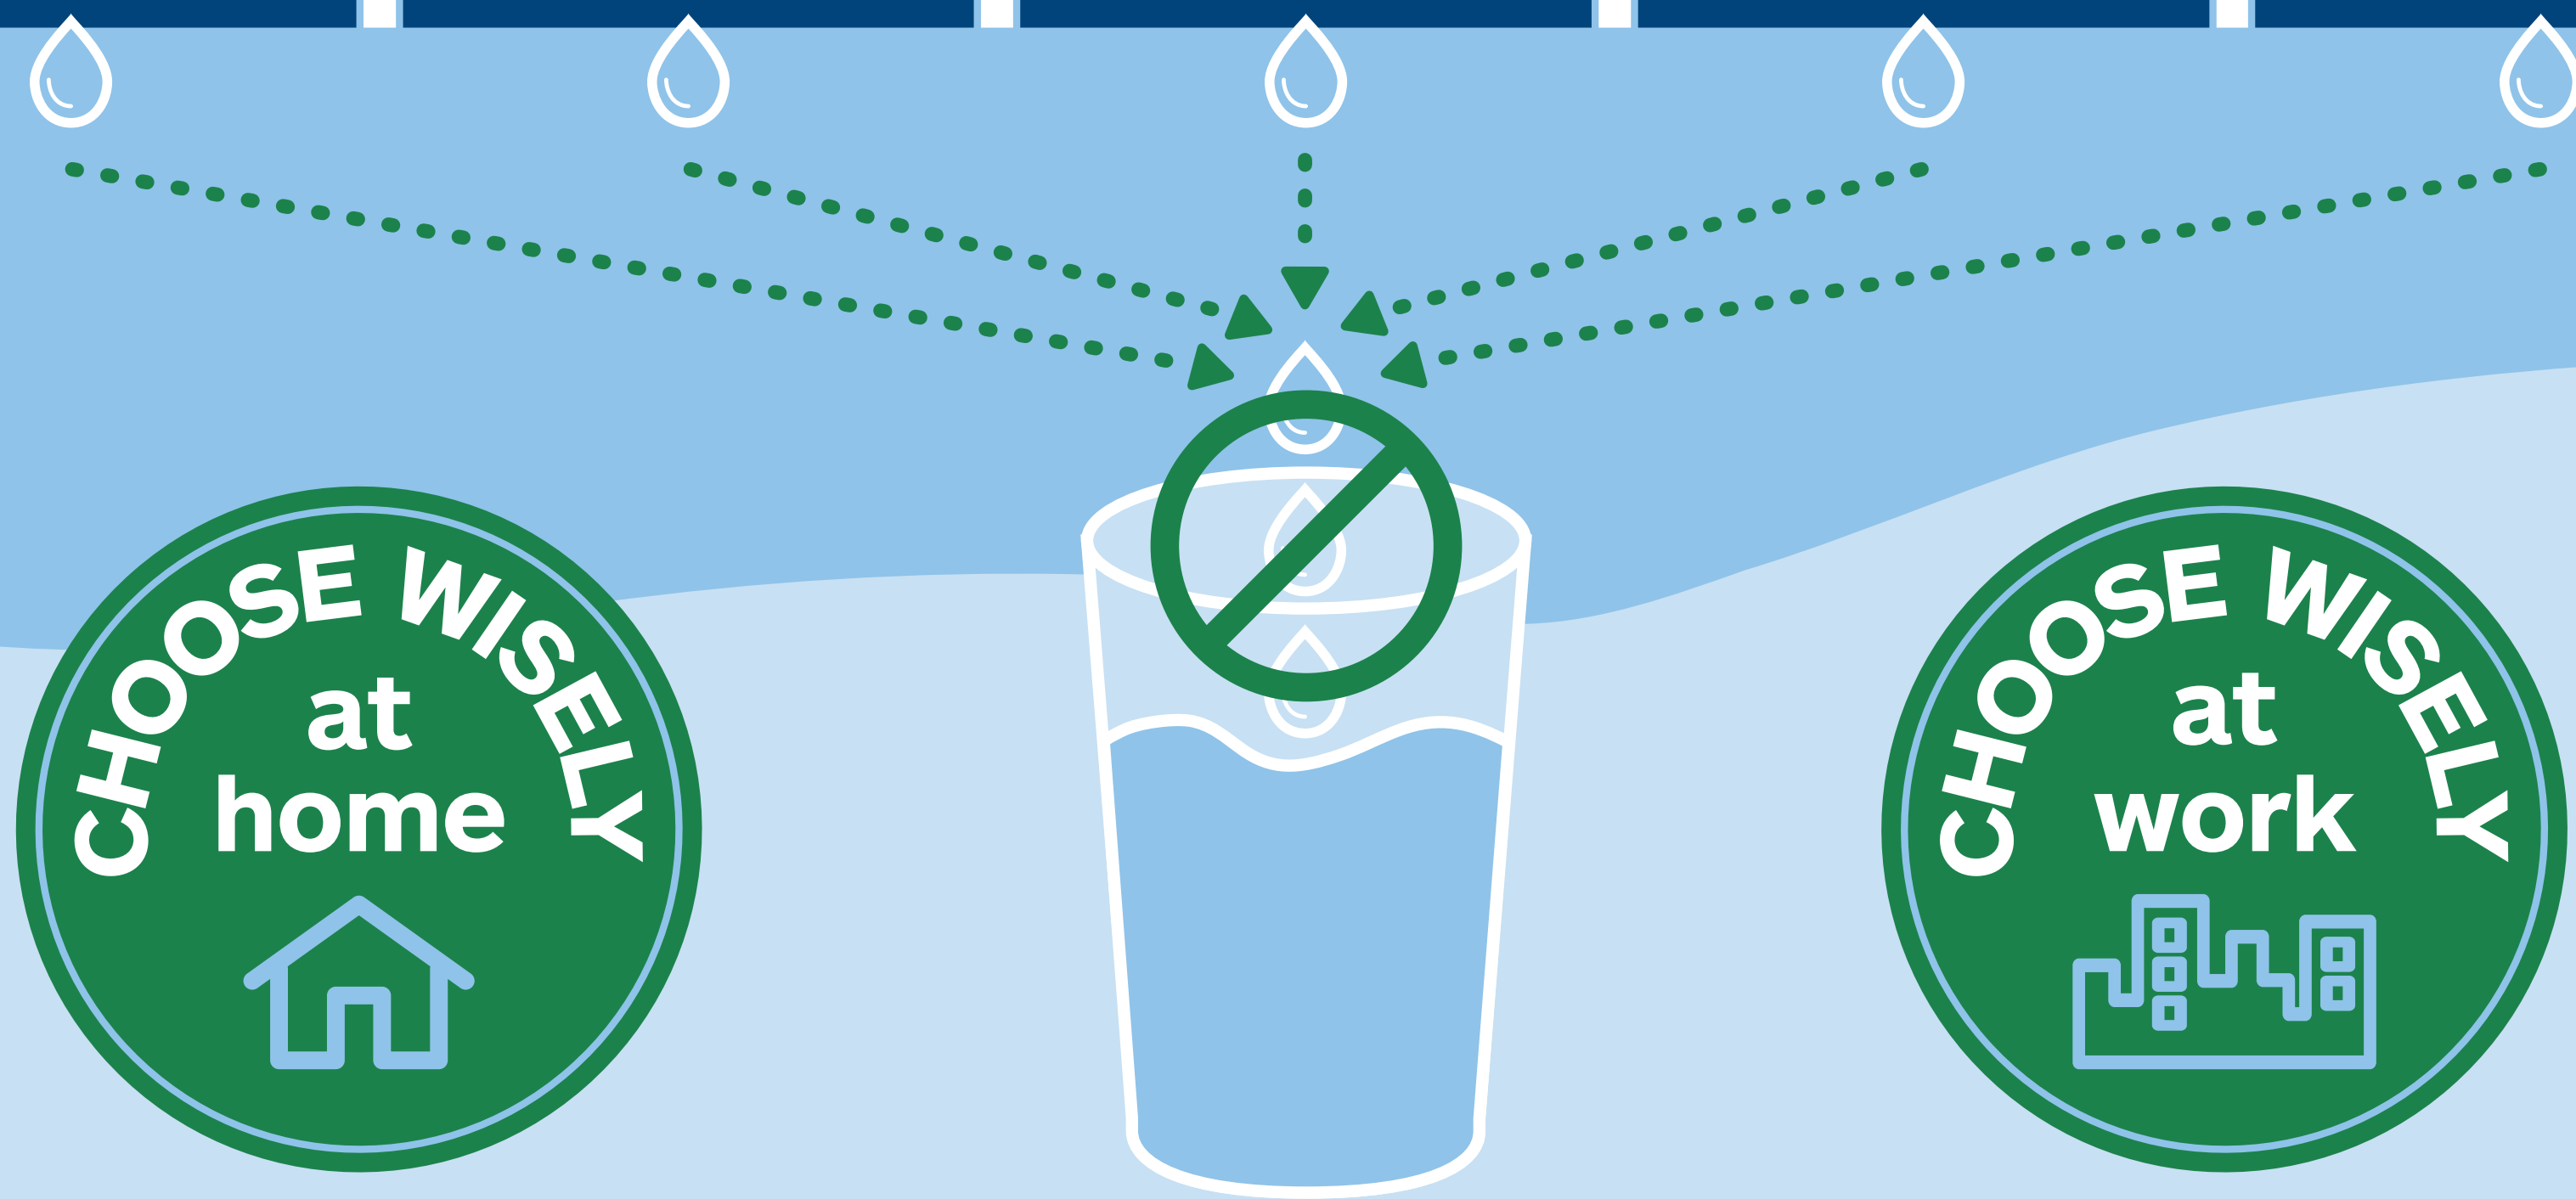

Paint/enamel/  
lacquer

Adhesive

Solvent

## What should you do?

1  
Select **LOW**  
or **NON** toxic  
products

2  
Use  
toxic products  
**CAREFULLY**

3  
Store  
toxic products  
**SMARTLY** at work

4  
Dispose of  
toxic products  
**PROPERLY**

5  
Have an onsite  
spill kit and spill  
response **PLAN**
