

The Health of Your Septic System Affects You

Your system

Good to know

A properly functioning septic system enhances property value and may prevent costly replacement or repairs.

Maintaining your system

Certified Professional
Every 3-5 yrs

Pump
regularly

Inspect
often

Flush
responsibly

Identify septic failure

Stop + Look + Smell

slow drains • sewage backup • water pooling
lush grass • sewage smell

IMPORTANT

Why worry?

Septic systems that are failing or improperly maintained can contaminate your water supply and that of your neighbours.
